

UIViewController

IPdfDocumentDelegate

Ramboell.iOS.PdfViewController

```
classDiagram
    class UIViewController
    class IPdfDocumentDelegate
    class Ramboell_iOS_PdfViewController["Ramboell.iOS.PdfViewController"]
    UIViewController <|-- Ramboell_iOS_PdfViewController
    UIViewController --> IPdfDocumentDelegate
```

The diagram illustrates the relationship between three classes. At the top, there are two boxes: 'UIViewController' on the left and 'IPdfDocumentDelegate' on the right. Below them, centered, is a box for 'Ramboell.iOS.PdfViewController'. A vertical line descends from the bottom center of the 'UIViewController' box, and another vertical line descends from the bottom center of the 'IPdfDocumentDelegate' box. These two vertical lines meet a horizontal line. From the left end of this horizontal line, an arrow points up to the bottom center of the 'UIViewController' box. From the right end of this horizontal line, an arrow points up to the bottom center of the 'IPdfDocumentDelegate' box. This configuration indicates that 'Ramboell.iOS.PdfViewController' inherits from 'UIViewController' and implements the 'IPdfDocumentDelegate' protocol.
